

0x1329

h	e	l	l	o	\0
---	---	---	---	---	----

hi

0x1329

The diagram illustrates a memory pointer. A variable named 'hi' is shown in a box, containing the hexadecimal value '0x1329'. A curved arrow originates from the top of this box and points to the first cell of a six-cell array. The array contains the characters 'h', 'e', 'l', 'l', 'o', and a null terminator '\0'. Above the array, the address '0x1329' is written, indicating the starting address of the array.
